Re: Final Tier II Operating Permit (#077-00017)
Replacement Pages to Permit Package

Dear Mr. Krumm:

On January 4, 1996, the Division of Environmental Quality (DEQ) issued Lamb-Weston, Incorporated's American Falls' final Tier II Operating Permit. It was however discovered, after mail distribution, that within the permit packet, the operating permit itself had copier transmittal errors, and two pages were inadvertently copied onto one page. Please replace the enclosed pages with the pages that correspond to this error, pages 16-19.

DEQ apologies for any inconveniences this may have caused you in reviewing your permit. Please feel free to contact Harbi Elshafei, Air Quality Engineer, at (208) 373-0502 should you have any questions or concerns pertaining to this.

Sincerely,

Jessica Jones

AIR POLLUTION OPERATING PERMIT

PERMIT NUMBER

PERMITTEE AND LOCATION

Lamb-Weston, Incorporated
Tier II Operating Permit
American Falls, Idaho

077 - 00017

The Permittee is hereby allowed to operate the equipment described herein subject to the emission limits and monitoring and reporting requirements specified in this permit.

SOURCE

Fugitive Emission Sources - Transfer Points, Roads

1. SOURCE DESCRIPTION

1.1 Process Description

Trucks deliver potatoes to the site. Transfer operations of raw potatoes take place in two (2) enclosed areas, the receiving areas of the main building and the raw storage areas. End products are shipped from the plant site by trucks. Plant roads are largely unpaved, but a portion is paved.

Emissions resulting from the above process and operations are fugitive particulate emissions.

2. EMISSION LIMITS

2.1 Fugitive Emissions

Fugitive emissions generated from transfer points, paved and unpaved roads, and all other sources of fugitive emissions at the facility shall be reasonably controlled in accordance with IDAPA 16.01.01.650, and IDAPA 16.01.01.651 (Rules for the Control of Air Pollution in Idaho).

3. OPERATING REQUIREMENTS

3.1 Control of Fugitive Emissions

Some of the reasonable control precautions may include, but are not limited to, the following:

3.1.1 Use of water or environmentally safe chemical dust suppressants;

3.1.2 Use of control equipment or enclosures; and

3.1.3 Paving of haul roads.

OPERATING PERMIT GENERAL PROVISIONS

- A. All emissions authorized herein shall be consistent with the terms and conditions of this permit. The emission of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit and the **Rules for the Control of Air Pollution in Idaho**, and the Environmental Protection and Health Act, Idaho Code 39-101 et. seq.
- B. The Permittee shall at all times (except as provided in the **Rules for the Control of Air Pollution in Idaho**) maintain in good working order and operate as efficiently as practicable, all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable laws for the control of air pollution.
- C. The Permittee shall allow the Director, and/or his authorized representative(s), upon the presentation of credentials:
- 1) To enter upon the Permittee's premises where an emission source is located, or in which any records are required to be kept under the terms and conditions of this permit; and
 - 2) At reasonable times to have access to and copy any records required to be kept under the terms and conditions of this permit, to inspect any monitoring methods required in this permit, and to require stack emission testing (i.e., performance tests) in conformance with state approved or accepted EPA procedures when deemed appropriate by the Director.
- D. Except for data determined to be confidential under Section 39-111, **Idaho Code**, all reports prepared in accordance with the terms of this permit shall be available for public inspection at the appropriate regional office of the Division of Environmental Quality.
- E. Nothing in this permit is intended to relieve or exempt the Permittee from compliance with any applicable federal, state, or local law or regulation, except as specifically provided herein.
- F. In the event of any change in control or ownership of source(s) from which the authorized emissions emanate, the Permittee shall notify the succeeding owner or controller of the existence of this permit by letter, a copy of which shall be forwarded to the Director.
- G. This permit shall be renewable on the expiration date, provided the Permittee submits any and all information necessary for the Director to determine the amount and type of air pollutants emitted from the equipment for which this permit is granted. Failure to submit such information within sixty (60) days after receipt of the Director's request shall cause the permit to be voided.
- H. The Director may require the Permittee to develop a list of Operation and Maintenance Procedures which must be approved by the Department. Such list of procedures shall become a part of this permit by reference, and the Permittee shall adhere to all of the operation and maintenance procedures contained therein.
